

Oussama Chatri

FULL-STACK DEVELOPER

Biskra, Algeria | +213 667 641 900 | osamachatri@gmail.com | github.com/osamachatri

■ PROFESSIONAL SUMMARY

4th-year Engineering student specializing in Security of Systems, building production-grade software across the full stack. Strong proficiency in Kotlin, Java, Spring Boot, and Jetpack Compose with demonstrated experience delivering desktop applications, Android apps, and backend APIs. Self-learner with a portfolio centered on offline-first architecture and cross-platform development. Open to remote, hybrid, and on-site software engineering opportunities worldwide.

■ TECHNICAL SKILLS

Languages: Kotlin, Java, Python (Familiar: TypeScript, Go, C++)

Frameworks: Jetpack Compose (Android & Desktop), Spring Boot, REST APIs

Databases: PostgreSQL, MySQL, Redis, MongoDB

Security: Network Security Fundamentals, Cryptography, Secure Coding Practices, Licensing

Tools: Git, Docker, CI/CD

Practices: Offline-first architecture, cross-platform development, production deployment

■ EXPERIENCE

Software Engineering Intern

Wellledge / HDSS — Algiers, Algeria

Apr 2026

On-site

- Explored industrial engineering challenges and contributed to the development of engineering solutions supporting decision-making processes
- Gained first-hand exposure to how production-level software is architected, built, and delivered to clients in an enterprise setting
- Learned network and code security practices applied in a production environment, along with software licensing considerations for commercial products

■ PROJECTS

ProductivityX

github.com/productivityx-app

Full-stack offline-first productivity system unifying notes, tasks, calendar, Pomodoro timer, and AI assistant. Spring Boot backend serving Android & Desktop (Jetpack Compose) and Web (TypeScript) frontends with offline sync.

WellLogAnalyzer

github.com/osamachatri/WellLogAnalyzer

Offline hydraulics simulation desktop app for petroleum engineers, built for a technical assessment. Kotlin & Jetpack Compose Desktop app with a custom hydraulics engine (ECD, APL, bit hydraulics per API RP 13D), interactive 2D charts, a 3D wellbore viewer, and one-click Excel/Word report export, structured with Clean Architecture.

Depan.Go

Team project, 2nd year — ESI SBA

Android app connecting users in remote areas with nearby roadside assistance and on-demand service providers.

■ EDUCATION

ENSTA

École Nationale Supérieure des Technologies Avancées

Engineering degree in Security of Systems — 4th year, 5-year Engineer program

2025 – Present

ESI SBA

École Supérieure d'Informatique Sidi Bel Abbés

Computer Science — First 2 years of engineering program

2023 – 2025
